Applicant's election with traverse of claims 4-15 in the reply filed on 6/6/05 is acknowledged. The traversal is on the ground(s) that it would not be an undue burden on the Examiner to consider all claims. This is not found persuasive because consideration of the method would require substantial additional examination.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/6/05.

\* \* \* \* \*

Claims 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 12 & 14, it appears that "insert gas" should be --inert gas--.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 5, 7-9, 11-13, & 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Brooks 6,003,674.

Brooks shows a container for a wafer, including a box 11 having a through hole 36; a bag B enclosing the box; and a dry inert gas G pumped into the bag and box to preserve the wafer.

Claims 6 & 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
